AUSTIN DECICCO

(908) 442-0922 | austin908442@gmail.com | austindecicco.com | linkedin.com/in/austin-decicco

EDUCATION

Rutgers University — New Brunswick, NJ
M.S. in Mathematics, GPA 4.0 — *Expected May 2027*
- Relevant coursework: *Graph Theory* (A), *Algorithmic Trading and Portfolio Management* (IP) *Financial Statistics and Risk Management* (IP), *Experimental Mathematics* (A)

Rutgers University — New Brunswick, NJ
*B.A. in Mathematics, GPA 3.96 — **Summa Cum Laude*** — *May 2023*
- Relevant coursework: *Introduction to Stochastic Processes* (A), *Mathematical Theory of Statistics* (A) *Mathematical Theory of Probability* (A), *Linear Optimization* (A)

University of Maryland — College Park, MD
B.S. in Economics | Minor in Statistics — *May 2022*
- Relevant coursework: *Econometrics* (A+), *Advanced Topics in Econometrics* (A) *Game Theory* (A), *Mathematical Methods for Physics* (A–)

RESEARCH PROJECTS

Liquidity-Dependent Retrace of Price Spikes under Cross-Venue Arbitrage — Fall 2026
Independent research, Rutgers (Prof. Larsen)
- Proposed a model of how far a CEX price spike retraces once arbitrage with a constant-product AMM pool closes the gap, as a function of pool liquidity, slippage, and book depth; to be estimated on ETH data, evaluated out of sample.

Permutation & SYT Statistics via the Robinson–Schensted Algorithm — Spring 2026
Project Lead, with Jike Liu — Experimental Mathematics, Rutgers (Prof. Doron Zeilberger)
- Computational study of the RS bijection in Maple: verified the Logan–Shepp limit shape and $\lambda_1/\sqrt{n} \to 2$ convergence; quantified covariance and correlation of longest increasing/decreasing subsequence lengths; tested an asymptotic independence conjecture for fixed-entry locations in the insertion and recording tableaux. Identified novel integer sequences. Paper, slides, code, and data: austindecicco.com/gradp.html.

EXPERIENCE

Generalist — Self-Directed
U.S. Equity Markets; Residential Property — *May 2023 – Present*
- Special-situations and thematic equity. Largest successes were a post-restructuring position in American Coastal Insurance (ACIC, formerly UIHC) and thematic AI and semiconductor exposure during the 2023–2024 rally.
- Directed the renovation of a residential property: managed contractors, capital improvements, and project accounting.

Cryptocurrency Arbitrage — Self-Directed
Ethereum and VeChain DeFi Ecosystems — *2020 – 2022*
- Manually executed hundreds of cross-DEX arbitrage trades on Ethereum (Uniswap) and VeChain (Vexchange, Betterswap, and others) during the 2020–2022 DeFi cycle; entry threshold scaled with capital and gas to clear fixed and proportional fees plus a buffer for expected spread decay over the ∼5-minute manual execution window.

SKILLS

Programming Experience: Python, Maple, Java, SAS, Stata, MATLAB, LaTeX, HTML, CSS.

Quantitative: Stochastic processes, mathematical statistics, time-series and panel-data econometrics, regression and hypothesis testing, combinatorics, Monte Carlo and bootstrap methods.

Markets: 10+ years personal trading (equities, options, crypto); fundamental and special-situations equity analysis.

SERVICE & OUTREACH

Volunteer Firefighter — Flemington, NJ
Flemington Fire Department — *May 2024 – Present*

Executive, College Park Student Investment Group — College Park, MD
University of Maryland — *2020 – 2021*
- Prepared market commentary, organized and led group meetings on current conditions, and educated peers.
