EDUCATION

Rutgers University

M.S. in Mathematics, GPA 4.0

- Relevant coursework: *Graph Theory* (A), *Algorithmic Trading and Portfolio Management* (IP)
Financial Statistics and Risk Management (IP), *Experimental Mathematics* (A)

New Brunswick, NJ

Expected May 2027

Rutgers University

B.A. in Mathematics, GPA 3.96 — **Summa Cum Laude**

- Relevant coursework: *Introduction to Stochastic Processes* (A), *Mathematical Theory of Statistics* (A)
Mathematical Theory of Probability (A), *Linear Optimization* (A)

New Brunswick, NJ

May 2023

University of Maryland

B.S. in Economics | Minor in Statistics

- Relevant coursework: *Econometrics* (A+), *Advanced Topics in Econometrics* (A)
Game Theory (A), *Mathematical Methods for Physics* (A–)

College Park, MD

May 2022

RESEARCH PROJECTS

Research in Financial Mathematics

Extracurricular, Rutgers (Prof. Larsen)

- Work so far has consisted of drafting a research proposal and self-teaching preparatory problem sets in Computational Finance.

Fall 2026

Permutation & SYT Statistics via the Robinson–Schensted Algorithm

Project Lead, with Jike Liu — *Experimental Mathematics*, Rutgers (Prof. Doron Zeilberger)

- Computational study of the RS bijection in Maple: verified the Logan–Shepp limit shape and $\lambda_1/\sqrt{n} \rightarrow 2$ convergence; quantified covariance and correlation of longest increasing/decreasing subsequence lengths; tested an asymptotic independence conjecture for fixed-entry locations in the insertion and recording tableaux. Identified novel integer sequences. Paper, slides, code, and data: austindecicco.com/gradp.html.

Spring 2026

EXPERIENCE

Independent Investor

U.S. Equity Markets

- Discretionary equity portfolio returned **120%** from May 2023 – Feb 2024 versus SPY +**26%** over the same period.
- Approach: concentrated, special-situations and thematic equity. Largest contributor was a post-restructuring position in American Coastal Insurance (ACIC, formerly UIHC); also held thematic AI and semiconductor exposure during the 2023–2024 rally.
- Directed end-to-end renovation of a residential property: managed contractors, capital improvements, and project accounting on a six-figure rehabilitation budget.
- Founded and manage a REI LLC based in Wyoming.

Self-Directed

May 2023 – Present

Cryptocurrency Arbitrage

Ethereum and VeChain DeFi Ecosystems

- Manually executed cross-DEX arbitrage on Ethereum (Uniswap) and VeChain (Vexchange, Betterswap, others) during the 2020–2022 DeFi cycle; entry threshold scaled with capital and gas to clear fixed and proportional fees plus a buffer for expected spread decay over the ~5-minute manual execution window.
- Hundreds of trades, low three-figures average profits per trade on capital-limited college accounts; manual execution was the binding latency constraint.

Self-Directed

2020 – 2022

Executive, College Park Student Investment Group

University of Maryland

- Prepared market commentary, organized and led group meetings on current conditions, and educated peers.

College Park, MD

2020 – 2021

Volunteer Firefighter

Flemington Fire Department

Flemington, NJ

May 2024 – Present

COMPETITIONS

Vanguard ETF Challenge

Ongoing

Bloomberg Global Trading Challenge

Registered

SKILLS

Programming Experience: Python, Maple, Java, SAS, Stata, MATLAB, $\text{\LaTeX}$, HTML, CSS.

Quantitative: Stochastic processes, mathematical statistics, time-series and panel-data econometrics, regression and hypothesis testing, combinatorics, Monte Carlo and bootstrap methods.

Markets: 10+ years personal trading (equities, options, crypto); fundamental and special-situations equity analysis.
